p. 92

- Hourly rate = amount \$ made per hour
- Straight time pay = total amount earned per pay period
- Formula:
Straight time pay =
(hourly rate) x (# hrs worked)

Example

Hourly rate? \$5.60

Straight time:

$$5.60 \times 25 = \$140$$

Section 2

O.T. pay

$$\text{OT pay} = (\text{O.T. rate}) \times (\text{O.T. hrs.})$$

*Time & a half: $1.5 \times$ regular rate

*Double time: $2 \times$ regular rate

$$\underline{\text{Gross Pay}} = \text{reg. pay} + \text{OT pay}$$
